

the family violence that threatens so many citizens. I further encourage all Americans to recognize the dedication of those working to end the horrors of abuse. Offering support, guidance, encouragement, and compassion to survivors, these caring individuals exemplify our Nation's highest ideals of service and citizenship.

IN WITNESS WHEREOF, I have hereunto set my hand this second day of October, in the year of our Lord nineteen hundred and ninety-five, and of the Independence of the United States of America the two hundred and twentieth.

WILLIAM J. CLINTON

Proclamation 6830 of October 4, 1995

Energy Awareness Month, 1995

By the President of the United States of America

A Proclamation

Although we tend to focus on energy issues only in times of crisis, Americans should not underestimate the daily impact of a clean, safe, affordable energy supply on maintaining our standard of living, protecting the environment, and ensuring our national defense. In the past 3 decades alone, disruptions in global oil markets and dramatic price shocks have caused international strife and economic recession. Energy choices affect air and water pollution; nuclear, toxic, and other waste disposal present potential hazards; and energy use can influence our precious wilderness and natural ecosystems.

As we observe Energy Awareness Month, 1995, this year's theme, "Energy Fuels Our Future," is a powerful reminder of the need to build a strong foundation of sustainable energy policies that will benefit the generations to come. We can be proud of the United States' efforts toward this end. In every critical sector of society—commercial and residential development, transportation, industry, utility management, and government—we have improved efficiency and reduced the environmental impact of energy production and consumption.

Our challenge today is to continue this work, and my Administration remains committed to the responsible use of existing resources and the progress of innovative technology. We have many objectives—enhancing the competitiveness of our Nation's oil producers, expanding the role of domestically produced natural gas, encouraging the development of renewable energy resources, minimizing the environmental impact of coal use, and supervising the safe contribution of nuclear energy. As we seek to strengthen our economy and ease the burden of energy use on the global environment, let us work together toward these vital goals.

NOW, THEREFORE, I, WILLIAM J. CLINTON, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim October 1995 as "Energy Awareness Month." I call upon government officials, educators, and all the people of the United States to observe this month with appropriate activities recognizing the central importance of energy use in our lives and to the future of our world.

IN WITNESS WHEREOF, I have hereunto set my hand this fourth day of October, in the year of our Lord nineteen hundred and ninety-five, and of the Independence of the United States of America the two hundred and twentieth.

WILLIAM J. CLINTON

Proclamation 6831 of October 5, 1995

National Breast Cancer Awareness Month, 1995

*By the President of the United States of America
A Proclamation*

Our Nation can take pride in the progress we have made in the war against breast cancer. Many patients who would have confronted prolonged suffering and tragic death just a few years ago can now weigh options for treatment and face the future with excellent chances for recovery. My Administration has made a strong commitment to ending breast cancer's threat to the health of American women, significantly increasing funding for research, launching a campaign to encourage older women to take advantage of the mammography covered by Medicare, and creating a National Action Plan on Breast Cancer. This initiative unites the Federal Government, advocacy groups, health professionals, and private industries in a dynamic partnership to develop new strategies for prevention and care.

Yet even as we celebrate these gains, we must remember that millions of American women still fight this terrible disease, and tens of thousands die each year as a result of its devastating effects. Every three minutes another woman is diagnosed, and breast cancer claims some 120 precious lives daily. It is the most common form of cancer among women in this country and the leading cause of cancer death for those aged 30 to 54. And all women—our mothers, sisters, daughters, and friends—face the same stark statistics.

If we are to protect our citizens and honor the memories of the brave women who, like my mother, lost their lives to breast cancer, we must rededicate ourselves to the final eradication of the illness. Although there is no known cure, early detection and advances in medical technology remain our best weapons. By doing routine self-examinations, undergoing regular mammograms, and keeping a schedule of preventive medical care, women can detect breast tumors early and dramatically reduce the spread of cancer. This month and throughout the year, let us work to increase awareness of these lifesaving therapies and renew our commitment to developing new means of prevention.

NOW, THEREFORE, I, WILLIAM J. CLINTON, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim October 1995 as National Breast Cancer Awareness Month. I urge the people of the United States to learn more about breast cancer and the resources we have—including examinations, mammography, good nutrition, and exercise—that may prevent its occurrence and minimize its spread. During this month, I call upon every citizen to extend special compas-
